

PREMIUM
316 GRADE STAINLESS STEEL
HIDDEN HEAD
DECKING SCREW

Designed to match the colour of your decking while giving you the hardness of Stainless Steel to protect against corrosion. // **Colour: Brown**

10g x 65mm

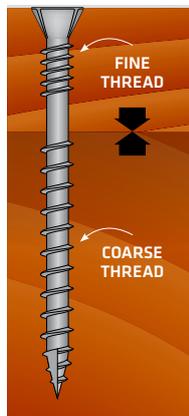

Qty: **300 Screws per box**

T20 Screwdriver Bit included

PRODUCT FEATURES

Double Thread (Fine + Coarse Thread)

- Offers superior fixing strength for your deck.
- The Fine Thread locks into the decking, while the Coarse Thread locks into the timber joist.
- Having a Fine Thread close to the head of the screw retains the screw strength, while also keeping the screw head flush with the top of the deck not allowing the decking timber to move down the screw shank during shrinkage.
- The smooth section on the screw ensures easy pull down and also allows for timber shrinkage between the underside of deck and top of the joist holding the head in a constant position with the top of the deck.

Hidden Head

The head is painted to match your decking in order to reduce visibility. With nibs under the head for countersinking.

T20 Star Drive Hd

Provides a unique, aesthetically pleasing look to your deck.

Type 17 Point

Helps the screw penetrate quickly into the decking.
